

ACCELERATED REHABILITATION PROTOCOL ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

PREOPERATIVE PHASE

Goals: Diminish inflammation, swelling, and pain Restore normal range of motion (especially knee extension) Restore voluntary muscle activation Provide patient education to prepare patient for surgery

Brace - Elastic wrap or knee sleeve to reduce swelling

Weight Bearing – As tolerated with or without crutches

Exercises: *Ankle Pumps *Passive knee extension to zero *Passive knee flexion to tolerance *Straight Leg Raises (3 Way, Flexion, Abduction, Adduction) *Quadriceps Setting *Closed kinetic chain exercises: mini squats, lunges, step-ups

Muscle Stimulation – Electrical muscle stimulation to quadriceps during voluntary quadriceps exercises (4 to 6 hours per day)

Neuromuscular/Proprioception Training -

- Eliminate quad avoidance gait
- Retro stepping drills
- Joint repositioning on Sports RAC
 - Passive/active reposition at 90, 60, 30 degrees
 - CKC squat/lunge repositioning on screen

Cryotherapy/Elevation – Apply ice 20 minutes of every hour, elevate leg with knee in full extension (knee must be above heart)

Patient Education – Review postoperative rehabilitation program Review instructional video (optional) Select appropriate surgical date

IMMEDIATE POST-OPERATIVE PHASE (Day 1 to Day 7)

Goals: Restore full passive knee extension Diminish joint swelling and pain Restore patellar mobility Gradually improve knee flexion Re-establish quadriceps control Restore independent ambulation

ACCELERATED REHABILITATION PROTOCOL ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

Postoperative Day 1

Brace – EZ Wrap brace/Immobilizer applied to knee, locked in full extension during ambulation of Protonics

Weight Bearing – Two crutches, weight bearing as tolerated

Exercises: *Ankle pumps *Overpressure into full, passive knee extension *Active and Passive knee flexion (90 degree by day 5) *Straight leg raises (Flexion, Abduction, Adduction) *Quadriceps isometric setting *Hamstring stretches *Closed kinetic chain exercises: mini squats, weight shifts

Muscle Stimulation – Use muscle stimulation during active muscle exercises (4-6 hours/day)

Ice and Evaluation – Ice 20 minutes out of every our and elevate with knee in full extension

Postoperative Day 2 to 3

Brace – EZ Wrap brace/Immobilizer, locked at zero degrees extension for ambulation and unlocked for sitting, etc.

Weight Bearing – Two crutches, weight bearing as tolerated

Range of Motion – Remove brace perform range of motion exercises 4 to 6 times/day

Exercises: *Multi-angle isometrics at 90 and 60 degrees (knee extension) *Knee Extension 90-40 degrees *Overpressure into extension (knee extension should be at least 0 degrees to slight hyperextension) *Patellar mobilization *Ankle pumps *Straight leg raises (3 directions) *Mini squats and weight shifts *Quadriceps isometric setting

Muscle Stimulation – Electrical muscle stimulation to quads (6 hours per day)

Ice and Evaluation – Ice 20 minutes out of every hour and elevate leg with knee in full extension

Postoperative Day 4 to 7

Brace – EZ Wrap brace/Immobilizer, locked at zero degrees extension for ambulation and unlocked for sitting, etc.

ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

Weight Bearing – Two Crutches weight bearing as tolerated

Range of Motion – Remove brace to perform range of motion exercises 4-6 times per day, knee flexion 90 degrees by day 5, approximately 100 degrees by day 7

Exercises: *Multi-angle isometrics at 90 and 60 degrees (knee extension) *Knee Extension 90-40 degrees *Overpressure into extension (full extension 0 degrees to 5-7 hyperextension) *Patellar mobilization (5-8 times daily) *Ankle pumps *Straight leg raises (3 directions) *Mini squats and weight shifts *Standing Hamstring curls *Quadriceps isometric setting *Proprioception and balance activities

Neuromuscular training/proprioception – OKC passive/active joint repositioning at 90, 60 degrees CKC squats/weight shifts with repositioning on sports RAC

Muscle Stimulation – Electrical muscle stimulation (continue 6 hours daily)

Ice and Elevation – Ice 20 minutes of every hour and elevate leg with knee full extension

II. EARLY REHABILIATION PHASE (Week 2-4)

Criteria to Progress to Phase II

- 1) Quad Control (ability to perform good quad set and SLR)
- 2) Full passive knee extension
- 3) PROM 0-90 degrees
- 4) Good patellar mobility
- 5) Minimal joint effusion
- 6) Independent ambulation

Goals: Maintain full passive knee extension (at least 0 to 5-7 hyperextension) Gradually increase knee flexion Diminish swelling and pain Muscle control and activation Restore proprioception/neuromuscular control

Normalize patellar mobility

ACCELERATED REHABILITATION PROTOCOL ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

<u>Week Two</u>

Brace – Continue locked brace for ambulation

Weight Bearing – As tolerated (goal is to discontinue crutches 10-14 days post op)

Passive Range of Motion – Self-ROM stretching (4-5 times daily), emphasis on maintaining full, passive range of motion

KT 2000 Test - (15 lb. Anterior-posterior test only)

*Isometric quadriceps sets *Straight Leg raises (4 planes) *Leg Press (0-60 degrees) *Knee extension 90-40 degrees *Half squats (0-40) *Weight shifts *Front and side lunges *Hamstring Curls standing (active ROM) *Bicycle (if ROM allows) *Proprioception training *Overpressure into extension *Passive range of motion from 0 to 100 degrees *Patellar mobilization *Well leg exercises	Exercises:	 *Straight Leg raises (4 planes) *Leg Press (0-60 degrees) *Knee extension 90-40 degrees *Half squats (0-40) *Weight shifts *Front and side lunges *Hamstring Curls standing (active ROM) *Bicycle (if ROM allows) *Proprioception training *Overpressure into extension *Passive range of motion from 0 to 100 degrees *Patellar mobilization *Well leg exercises *Progressive resistance extension program – start with 1 lb., progress
---	------------	---

Proprioception/Neuromuscular Training

*OKC passive/active joint repositioning 90, 60, 30 degrees *CKC joint repositioning during squats/lunges *Initiate squats on tilt board use sports RAC with repositioning

Swelling control – Ice, compression, elevation

Week Three

Brace - Discontinue locked brace (some patients use ROM brace for ambulation)

Passive Range of Motion – Continue range of motion stretching and overpressure into extension (ROM should be 0-100/105 degrees)

Exercises: *Continue all exercises as in week two *Passive Range of Motion 0-105 degrees *Bicycle for range of motion stimulus and endurance

ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

*Pool walking program (if incision is closed)
*Eccentric quadriceps program 40-100 (isotonic only)
*Lateral lunges (straight plane)
*Front Step Downs
*Lateral Step-Overs (cones)
*Stair-Stepper machine
*Progress Proprioception drills, neuromuscular control drills
*Continue passive/active reposition drills on sports RAC (CKC, OKC)

III. PROGRESSIVE STRENGTHENING/NEUROMUSCULAR CONTROL PHASE (Week 4-10)

Criteria to Enter Phase III

- 1) Active Range of Motion 0-115 degrees
- 2) Quadriceps strength 60 % > contralateral side (isometric test at 60 degree knee flexion)
- 3) Unchanged KT Test bilateral values (+1 or less)
- 4) Minimal to no full joint effusion
- 5) No joint line or patellofemoral pain

Goals: Restore full knee range of motion (0 to 125 degrees)

Improve lower extremity strength Enhance proprioception, balance, and neuromuscular control Improve muscular endurance Restore limb confidence and function

Brace – No immobilizer or brace, may use knee sleeve to control swelling/support

Range of Motion – Self-ROM (4-5 times daily using the other leg to provide ROM), emphasis on maintaining zero degrees passive extension - PROM 0-125 degrees at 4 weeks KT 2000 Test – (Week 4, 20 lb. anterior and posterior test)

Week 4

Exercises: *Progress isometric strengthening program *Leg Press (0-100 degrees) *Knee extension 90 to 40 degrees *Hamstring Curls (isotonics) *Hip Abduction and Adduction *Hip Flexion and Extension *Lateral Step-Overs *Lateral Lunges (straight plane and multi-plane drills) *Lateral Step Ups *Front Step Downs *Wall Squats

ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

*Vertical Squats *Standing Toe Calf Raises *Seated Toe Calf Raises *Biodex Stability System (Balance, Squats, etc) *Proprioception Drills *Bicycle *Stair Stepper Machine *Pool Program (Backward Running, Hip and Leg Exercises)

Proprioception/Neuromuscular Drills

- Tilt board squats (perturbation)
- Passive/active reposition OKC
- CKC repositioning on tilt board with sports RAC
- CKC lunges with sports RAC

Week 6

KT 2000 Test – 20 and 30 lb. anterior and posterior test

Exercises: *Continue all exercises *Pool running (forward) and agility drills *Balance on tilt boards *Progress to balance and ball throws *Wall slides/squats

Week 8

KT 2000 Test – 20 and 30 lb. anterior and posterior test

Exercises: *Continue all exercises listed in Weeks 4-6 *Leg Press Sets (single leg) 0-100 degrees and 40-100 degrees *Plyometric Leg Press *Perturbation Training *Isokinetic exercises (90 to 40 degrees) (120 to 240 degrees/second) *Walking Program *Bicycle for endurance *Stair Stepper Machine for endurance *Biodex stability system *Sports RAC Neuromuscular training on tilt board and Biodex stability

Week 10

KT 2000 Test – 20 and 30 lb. and Manual Maximum Test Isokinetic Test – Concentric Knee Extension/Flexion at 180 and 300 degrees/second

ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

Exercises:

- *Continue all exercises listed in Weeks 6, 8 and 10
 - *Plyometric Training Drills
 - *Continue Stretching Drills

*Progress strengthening exercises and neuromuscular training

IV. ADVANCED ACTIVITY PHASE (Week 10-16)

Criteria to Enter Phase IV

- 1) AROM 0-125 degrees or greater
- 2) Quad strength 75% of contralateral side, knee extension flexor:extensor ratio 70% to 75%
- 3) No change in KT values (Comparable with contralateral side, within 2 mm)
- 4) No pain or effusion
- 5) Satisfactory clinical exam
- 6) Satisfactory isokinetic test (values at 180 degrees) Quadriceps bilateral comparison 75% Hamstrings equal bilateral Quadriceps peak torque/body weight 65% at 180°/s (males) 55% at 180°/s (females) Hamstrings/quadriceps ratio 66% to 75%
- 7) Hop Test (80% of contralateral leg)
- 8) Subjective knee scoring (modified Noyes System) 80 points or better
- Goals: Normalize lower extremity strength Enhance muscular power and endurance Improve neuromuscular control Perform selected sport-specific drills
- Exercises: *May initiate running program (weeks 10-12)
 - *May initiate light sport program (golf)
 - *Continue all strengthening drills
 - Leg press
 - Wall squats
 - Hip Abd/Adduction
 - Hip Flex/Ext
 - Knee Extension 90-40
 - Hamstring curls
 - Standing toe calf
 - Seated toe calf
 - Step down
 - Lateral step ups
 - Lateral lunges
 - *Neuromuscular training
 - Lateral step-overs cones
 - Lateral lunges

ACL-PTG RECONSTRUCTION

Chase D. Smith, MD

- Tilt board drills
 - Sports RAC repositioning on tilt board

Week 14-16

*Progress program *Continue all drills above *May initiate lateral agility drills *Backward running

V. <u>RETURN TO ACTIVITY PHASE</u> (Month 16-22)

Criteria to Enter Phase V

- 1) Full Range of Motion
- 2) Unchanged KT 2000 Test (within 2.5 mm of opposite side)
- 3) Isokinetic Test that fulfills criteria
- 4) Quadriceps bilateral comparison (80% or greater)
- 5) Hamstring bilateral comparison (110% or greater)
- 6) Quadriceps torque/body weight ratio (55% or greater)
- 7) Hamstrings/Quadriceps ratio (70% or greater)
- 8) Proprioceptive Test (100% of contralateral leg)
- 9) Functional Test (85% or greater of contralateral side)
- 10) Satisfactory clinical exam
- 11) Subjective knee scoring (modified Noyes System) (90 points or better)
- Goals: Gradual return to full-unrestricted sports Achieve maximal strength and endurance Normalize neuromuscular control Progress skill training
- Tests KT 2000, Isokinetic, and Functional Tests before return
- Exercises *Continue strengthening exercises
 - *Continue neuromuscular control drills
 - *Continue plyometrics drills
 - *Progress running and agility program
 - *Progress sport specific training
 - Running/cutting/agility drills
 - Gradual return to sport drills

6 MONTH FOLLOW-UP

Isokinetic test KT 2000 test Functional test

12 MONTH FOLLOW-UP

Isokinetic test KT 2000 test Functional test
